# Raising the Grade for Breastfeeding Access in California Schools 

Updated February 2021

## PROJECT OVERVIEW

414 school districts in 57 counties audited

## 3,699,939

 students impacted
## 356,633

employees
impacted

Federal and state laws require equal treatment for all students and employees in our state, yet breastfeeding women are often discriminated against in schools.

In 2019, CWLC launched an effort to evaluate student and employee access to breastfeeding accommodations in every California K-12 school district.

We reviewed policies and practices at more than 400 districts representing nearly 3.7 million students and 356,633 employees. The average grade of California districts initially was a C, indicating inadequate support for women.

To help districts improve, CWLC created tools and training to assist in the implementation of policies that support pregnant and parenting students and staff. By investing in partnerships, 84\% of the districts in California now have a grade of $A$ or $B$.

## Expanding Progress in Los Angeles County

This effort builds on the success of our previous initiative auditing the 81 school districts in LA County, done in partnership with the ACLU of Southern California and BreastfeedLA, When we began in 2015, our initial findings were disappointing: Only one district met our criteria while more than half received a grade of D or F. Since then, CWLC has worked closely with districts to bring them into legal compliance through policy adoption and implementation. We now proudly report an average grade of $A$ across LA County school districts.

Visit CWLC.org for the full report.

## RAISING THE GRADE

At the time of our initial statewide survey, 43 districts failed to meet any of our criteria. Only one in three districts received full marks. With our support, $\mathbf{8 4 \%}$ of districts are now receiving a grade of A or B .

Since we began our efforts, there has been a $46 \%$ increase in the number of districts providing employee lactation accommodation policies, and a $\mathbf{2 8 \%}$ increase in the number of districts with an identified Title IX Coodinator.

Several districts were already in full compliance when we began our work, but many lagged far behind with scores of $D$ and $F$. With assistance from CWLC, California districts improved their average grade from $C$ to $B$.

## HOW WE GRADE

We identified the five most important policies that students and employees need to understand their rights and feel supported. We then assessed each district by assigning one point for every criteria met. These policies must be accessible in order to be meaningful, so we sought this information the same way a student or employee would: by browsing the district's website and using internet search engines.

## WHY IT MATTERS

Breastfeeding has numerous health benefits for the baby and mother. The American Academy of Pediatrics recommends breastfeeding exclusively for the first six months after birth, yet many women find this challenging while attending school and work. Policies that provide clear guidance for students and employees can help improve women's ability to care for their children, complete their education, and earn an income. Nationally, 70\% of teen parents drop out of school, even though most would like to continue their education. By making breastfeeding accommodations accessible, districts can send the message that parenting and educational opportunities are not incompatible.

Title IX is a federal law that protects students and employees by prohibiting all forms of gender discrimination at schools, including disadvantaging women who need to express milk. California law also requires that most workplaces and schools provide reasonable breastfeeding accommodations. CWLC is a leading expert on Title IX enforcement in California, and we proudly advocate for women's legal rights at school and work.

## WHAT'S NEXT

Our goal is to support every California school district in providing equal educational and employment opportunities for pregnant and parenting students and staff. Building on the success of our work in Los Angeles County, CWLC will continue to work with non-compliant school districts across the state to raise their grades and meet the needs of women in California.
